NO		Organic Silicone Pro(OSPRO)	Organic Silicone (OS)	Platinum Silicone Pro (PSPRO)	Platinum Silicone (PS Whole Or OS Head+PS body)
	Description	Organic Silicone PRO (OSP) has 10 skin layers that reproduce realistic human skin features, such as pores, veins, and skin texture. It is not only the most luxurious collection of all XYcolo dolls, but also the best silicone dolls in China. By default with aluminum hinged skeleton. easy to manipulate.	Organic Silicone (OS) is the lightest and has good body finishing. It is the least soft type silicone, you can add some extra softness options such as soft thigh to increase its softness. By default with aluminum hinged skeleton. easy to manipulate.	It is secondary options for those who wants "real human muscle feeling", with less budget. The skin color carrying feature is as same as PS skin, it fades if rubbing hard. By default is with steel skeleton.	Platinum Silicone (PS) is the entry-level choice and the most affordable range of the XYcolo collections. With a price of TPE doll, you take home a full silicone doll. By default is with steel skeleton.
1	PROs	<p>1) It is the most real- softness type with no additional softness options available.</p> <p>2) Permanent makeup, custom makeup, and eyebrow & hair transplant are available.</p> <p>3) Real human body feeling. designed in layers, with a layer of fat under the skin, which simulates the touch of human muscles, soft and real.</p> <p>4) Custom makeup and eyebrow & hair implants are acceptable.</p>	<p>1) OS dolls have great skin texture. It is the lightest silicone doll which is easy to pose and carry, photographers love this doll most.</p> <p>2) Support permanent makeup, makeup customization, and eyebrow&hair transplant.</p> <p>3) XYcolo OS material is the high-end silicone which has been certified by SGS, truly human health friendly, no odor, no harmful chemical additive.</p> <p>4) Custom makeup and eyebrow & hair implants are acceptable.</p>	<p>1) It is designed in layers, with a layer of fat under the skin, which simulates the touch of human muscles, soft and real.</p> <p>2) Midium price</p>	<p>1) PS has the same soft skin as TPE, but not as spongy as TPE. It is with high resilience, bouncy chest and buttocks, and realistic touch.</p> <p>2) Cost effective silicone doll.</p>
2	CONs	Delicate, requires your more attention to maintain her. Compared to OS, it is heavier.	Compared with PS material, OS material is slightly stiffer, with slower rebound and less elasticity. But it is still as soft as SILICONE.	<p>1) Permanent makeup, custom makeup, or eyebrow hair transplants are unavailable. with default steel skeleton, can be upgraded to aluminum hinged skeleton with extra fees.</p> <p>2) Custom makeup and eyebrow & hair implants are NOT allowed.</p>	<p>1) PS silicone dolls are heavy, lack detail on the skin surface, and makeup doesn't last long.</p> <p>2) Custom makeup and eyebrow & hair implants are NOT allowed.</p>
